PROFILE

I lead platform engineering at a London fintech, reporting to the CEO, and own its architecture, infrastructure, identity and security. I build and run the internal developer platform the company ships with, and hold AI-written code to the same standard as anyone's: a written spec first, tests first, gated by CI and reviewed by a model from a second vendor.

EXPERIENCE

Lead Platform Engineer, Altimist Ltd

Aug 2023 – present

- Built the internal developer platform for AI-assisted delivery and rolled its engineering standards out to about 26 repositories by automated pull request: specs before code, tests first, a gate that stops an agent finishing until typecheck, lint and tests pass, and review by a model from a second vendor.
- 1,400+ merged pull requests across 40 repositories between Dec 2025 and Sep 2026; monthly volume rose from 76 to 381.
- Built the company's identity provider from scratch: WebAuthn passkeys on did:web with W3C Verifiable Credentials. The sign-in for the company's internal applications since May 2026, with federation to self-hosted identities.
- Run cloud and SaaS infrastructure as code through Terraform Cloud (plan on pull request, apply on merge, daily drift detection) across GitHub, Cloudflare, Kafka, Databricks and observability. AWS and Microsoft 365 as code; joiner, mover and leaver access automated.
- Moved all application hosting to Cloudflare Workers and retired Vercel (Sep 2026); removing Vercel's per-seat charges cut the monthly hosting bill roughly tenfold.
- Built an on-premises Python speech pipeline on an NVIDIA DGX Spark (NeMo transcription, diarisation, voiceprint speaker naming) for audio that cannot leave the building. It feeds searchable, human-verified records for decision and action tracking.
- Built an iOS and web location-tracking demonstration, with privacy controls, for a prospective client.
- Set technical direction through architecture decision records: 44 of the company's 61, including the identity move from OIDC to did:web. Own vendor selection.
- Designed an agent execution and evaluation platform, now at design and feasibility stage: sandboxed runs with per-run credentials, durable queue-driven dispatch and review gates against written criteria. A container spike measured a 3.3 s cold start and 32 ms warm.

Software development and retraining, Self-employed

Sep 2021 – Aug 2023

- Delivered a paid client website while retraining in full-stack development (JavaScript, React, Python, REST APIs, SQL). Tutored A-Level and IB mathematics privately.

Teacher of Mathematics, Wimbledon High School GDST

Sep 2019 – Jul 2021

- Taught mathematics across Key Stages 3–5, including GCSE and A-Level, adapting lessons to gaps in pupils' understanding. Completed the NQT induction year and a further year.

Earlier: academic tutor and mentor, Leading Lights Tuition (2015–2018); special projects coordinator and volunteer corps member, City Year UK (2014–2016).

SELECTED PERSONAL PROJECTS

- **patrickjv.com**: One content file generates the page, schema.org data, llms.txt, Markdown and WebMCP tools, plus a remote MCP server listed on the MCP Registry; Cloudflare Workers with Durable Object quotas, 110+ tests and a production smoke monitor.
- **Kaizen Kingdom**: An adaptive maths learning platform, in development.

SKILLS

Programming	TypeScript, Python, SQL, PowerShell
Platform and delivery	internal developer platforms, developer experience, CI/CD (GitHub Actions), GitOps, infrastructure as code, test-driven development, code review, architecture decision records
AI	agentic AI, AI agents, Claude Code, Model Context Protocol (MCP), LLM evaluation (review gates), speech recognition (NVIDIA NeMo)
Infrastructure	Cloudflare (Workers, Containers, Queues, Durable Objects, R2), Terraform Cloud, AWS (organisation and IAM), Microsoft 365
Identity and security	WebAuthn passkeys, did:web, Verifiable Credentials, identity and access management, secrets management (1Password)

EDUCATION

PGCE Secondary Mathematics, University College London (IOE)	2018 – 2019
BEng (Hons) Electrical and Electronic Engineering, 2:1, University of East London	2011 – 2014

SPOKEN LANGUAGES

English (native), Portuguese (fluent), Cantonese (intermediate)
